Purpose

As Sarten, we recognize our responsibility in protecting diminishing water resources and ensuring sustainable water management. In this regard, we have developed this policy to ensure the effective and efficient use of water resources. Within the framework of this policy, we aim to minimize our water consumption, reduce our environmental impact, and support safe water access for communities. Additionally, by calculating our water footprint, we take the necessary steps to better understand and manage our water usage and its impacts.

2. Scope

This policy applies to all operational areas, facilities, and employees of Sarten Ambalaj Sanayi ve Ticaret A.Ş.. It covers all operational processes and decision-making mechanisms affecting water management. Furthermore, we aim to promote our water management principles among our suppliers, business partners, and local communities to ensure their adoption within these processes.

3. Requirements

We commit to:

- Integrating water management into our business decision-making process and governance.
- Evaluating and managing our water management performance through Environmental and Occupational Health & Safety (OHS) Management System principles and expectations.
- Complying with all legal requirements and implementing preventive operational practices.
- Conducting water footprint assessments and water management risk evaluations at all facilities where there is a significant potential impact on water resources.
- Taking necessary precautions to protect the water resources surrounding our production facilities and operations.
- Considering the impact on surrounding water resources during new projects and expansions.
- Ensuring sustainable water use by implementing eco-friendly practices and technologies.
- Educating and raising awareness among our employees and suppliers on the importance of water management.
- Supporting safe access to water, hygiene, and sanitation for our employees and local communities.
- Collaborating with all stakeholders to protect water resources and raising their awareness on the issue.
- Minimizing the use of chemicals that could contaminate water sources and adopting environmentally friendly alternatives.
- Participating in sustainable water management projects in cooperation with other organizations.

- Continuously assessing the impact of our activities on water consumption and making necessary improvements.
- Regularly reviewing and updating our water management policy.
- Continuously improving our water conservation efforts by adopting best practices.

We are committed to these principles to ensure responsible and sustainable water management at Sarten.
